

Agile Courses Offered by The Westfall Team

SAFe® Advanced Scrum Master 4.5 is a two-day official Scaled Agile course on applying a Lean-Agile mindset with SAFe to prepare for the SAFe Advanced Scrum Master (SSM) Certification. This course prepares current Scrum Masters for their leadership role in facilitating Agile team,

program, and enterprise success in a Scaled Agile Framework (SAFe®) implementation. The course covers facilitation of cross-team interactions in support of program execution and relentless improvement. It enhances the Scrum paradigm with an introduction to scalable engineering and DevOps practices; the application of Kanban to facilitate the flow of value; and supporting interactions with architects, product management, and other critical stakeholders in the larger program and enterprise contexts.

The course offers actionable tools for building high-performing teams and explores practical ways of addressing Agile and Scrum anti-patterns in the enterprise.

This course is an officially licensed version of SAFe Advanced Scrum Master 4.5 from Scaled Agile, Inc. The course registration includes:

- The course workbook, study materials, practice test and student learning plan to help students prepare for the SAFe Advanced Scrum Master (SASM) certification
- One free attempt to take the SAFe Advanced Scrum Master (SASM) certification test (subsequent attempts available for an additional fee) - Attendees must attend both days of the course in order to be eligible for the exam.
- One year membership to the Safe Community Platform
- Course certificate of completion

Method of Instruction: This course is taught through lecture, videos and interactive exercises. The emphasis is on acquiring a clear understanding of SAFe® concepts and methods so attendees can transition the skills learned in this course to their own teams and work environments.

Learning Goals: To perform the role of a SAFe® Advanced Scrum Master, attendees should be able to:

- Apply SAFe principles to facilitation, enablement, and coaching in a multi-team environment
- Build a high-performing team and foster relentless improvement at scale
- Address Agile and Scrum anti-patterns
- Support the adoption of engineering practices, DevOps, and Agile architecture
- Learn to apply Kanban eXtreme Programming (XP) frameworks to optimize flow and improve the team's work
- Facilitate program planning, execution, and delivery of end-to-end systems value
- Support learning through participation in Communities of Practice and innovation cycles

Topics Covered:

- Exploring the Scrum Master role in the SAFe enterprise
- Applying SAFe Principles: A Scrum Master's perspective
- Exploring Agile and Scrum anti-patterns
- Facilitating program execution
- Improving flow with Kanban and XP
- Building high-performing teams
- Improving program performance with Inspect and Adapt
