

Agile Courses Offered by The Westfall Team

SAFe® For Teams 4.5 is a two-day official Scaled Agile course on applying a Lean-Agile mindset with SAFe to prepare for the SAFe Practitioner (SP) Certification. Attendees will build the skills needed to become a high-performing team member of an Agile Release Train (ART)—and learn how to

collaborate effectively with other teams—by becoming a SAFe® 4 Practitioner (SP). During this two-day course, attendees will gain an in-depth understanding of the ART, how it delivers value, and what they can do to effectively perform their role using Scrum, Kanban, and XP.

They will also learn how to write stories and break down features, plan and execute iterations, and plan Program Increments. Finally, they'll learn about the continuous delivery pipeline and DevOps culture, how to effectively integrate with other teams in the program, and what it takes to continuously improve the train.

This course is an officially licensed version of SAFe For Teams 4.5 from Scaled Agile, Inc. The course registration includes:

- The course workbook, study materials, practice test and student learning plan to help students prepare for the SAFe Practitioner (SP) certification
- One free attempt to take the SAFe Practitioner (SP) certification test (subsequent attempts available for an additional fee) - Attendees must attend both days of the course in order to be eligible for the exam.
- One year membership to the Safe Community Platform
- Course certificate of completion

Method of Instruction: This course is taught through lecture, videos and interactive exercises. The emphasis is on acquiring a clear understanding of SAFe® concepts and methods so attendees can transition the skills learned in this course to their own teams and work environments.

Learning Goals: To perform the role of a SAFe® Practitioner, attendees should be able to:

- Apply SAFe to scale Lean and Agile development in their enterprise
- Know their team and its role on the Agile Release Train
- Know all other teams on the train, their roles, and the dependencies between the teams
- Plan Iterations
- Execute Iterations and demonstrate value
- Plan Program Increments
- Integrate and work with other teams on the train

Topics Covered:

- Introducing the Scaled Agile Framework (SAFe)
- Building an Agile Team
- Planning the Iteration
- Executing the Iteration
- Executing the Program Increment

See scaledagileframework.com for more information about the Scale Agile Framework (SAFe®)
