Agile Courses
Offered by The Westfall Team

SAFe® Scrum Master 4.5 is a two-day official Scaled Agile course on applying a Lean-Agile mindset with SAFe to prepare for the SAFe Scrum Master (SSM) Certification. Attendees will gain an understanding of the role of a Scrum Master in a SAFe enterprise. Unlike traditional Scrum Master training that focuses on the fundamentals of team-level Scrum, the SAFe Scrum Master course explores the role of the Scrum Master in the context of the entire enterprise, and prepares attendees to successfully plan and execute the Program Increment (PI), the primary enabler of alignment throughout all levels of a SAFe organization. This includes learning the key components of Agile at scale development, how Scrum is facilitated throughout the enterprise, and how to execute Iteration Planning.

Attendees will also discover how to build high performing Agile teams by becoming a servant leader and coach, and how to coach those teams to deliver the maximum business value at scale. SAFe Scrum Master (SSM) certification signifies that people are prepared to perform the role of Scrum Master in a SAFe environment, increasing their value to teams and organizations that are implementing SAFe.

This is course is an officially licensed version of SAFe Scrum Master 4.5 from Scaled Agile, Inc. The course registration includes:

- The course workbook, study materials, practice test and student learning plan to help students prepare for the SAFe Scrum Master (SSM) certification

- One free attempt to take the SAFe Scrum Master (SSM) certification test (subsequent attempts available for an additional fee) - Attendees must attend both days of the course in order to be eligible for the exam.

- One year membership to the Safe Community Platform

- Course certificate of completion

Method of Instruction: This course is taught through lecture, videos and interactive exercises. The emphasis is on acquiring a clear understanding of SAFe® concepts and methods so attendees can transition the skills learned in this course to their own teams and work environments.

Learning Goals: To perform the role of a SAFe® Scrum Master, attendees should be able to:

- Describe Scrum in a SAFe enterprise
- Facilitate Scrum events
- Facilitate effective Iteration execution
- Support effective Program Increment execution
- Support relentless improvement
- Coach Agile teams for maximum business results
- Support DevOps implementation

Topics Covered:

- Introducing Scrum in SAFe
- Characterizing the role of the Scrum Master
- Experiencing Program Increment planning
- Facilitating Iteration execution
- Finishing the Program Increment
- Coaching the Agile team
